Project Name	ComicCraft - AI Comic Story Creator
Team Lead	Sivapragasam S
Team Members	Deepak P, Lucky J, Elanthirayan S
Maximum Marks	Project Documentation

Project Description

ComicCraft is a web-based application that uses AI to generate personalized comic book stories and illustrations based on user-provided prompts.

Technology Summary

Built with FastAPI and integrated with Google Gemini AI models and Stable Diffusion through Hugging Face Diffusers. FPDF is used for PDF generation.

User Inputs

Story prompt, main character name, setting, tone, and art style.

Generated Output

A panel-by-panel storyline, narration, character dialogue, comic-style illustrations, web preview, and downloadable PDF.

User Flow

Input → generation → preview → download → export success.

Conclusion

ComicCraft demonstrates an end-to-end AI-assisted comic creation workflow that combines LLM-based storytelling and image generation.
