Customer / Problem	Root Cause / Limitations	Available Solutions / Your Solution
Non-artists, storytellers, hobbyists, students and casual comic creators.	Manual comic creation combines writing, illustration, dialogue, layout and export skills.	Manual tools provide control but require time and skills; ComicCraft combines major steps in one workflow.
Pain: creating story, dialogue, illustrations and layouts is effort-intensive.	Limited drawing/design skills, time and technical knowledge.	Gemini + Stable Diffusion + FastAPI automate the workflow.
Trigger: a new comic idea or desire to share a personalized story.	Users want quick transformation from idea to finished comic.	Prompt input → AI generation → preview → PDF export.
Before: effort and creative friction. After: easier generation and export.	Web interface and local FastAPI workflow.	Online web UI/API; local generated files.
