Define Problem Statements (Customer Problem Statement Template)

Target customers: non-artists, storytellers, hobbyists, students, and casual users interested in creating personalized comics.

Problem Statement

Users who want to create personalized comics need a simpler way to turn an idea into a complete story, dialogue, illustrations, panel sequence, preview, and downloadable PDF because manual comic creation requires multiple creative and technical skills.

Customer Need

A single workflow that accepts a small set of creative inputs and automates major comic-creation stages while allowing personalization.
